## OWNED COMPANY

### BETCO UNITED KUWAIT

#### CEO

#### BETCO

I quit SADEEM UNITED HOLDING CO. and I established BETCO United trading and contracting company. W.L.L. Kuwait in 2007. We specialize in Design-Build projects, infrastructure, electro-mechanical, landscape, and interior design.

Our proficiency spans from pre-construction services to complete turn-key construction projects. During a short period of time BETCO UNITED became one of the leading companies in the Construction field within the State of Kuwait. This growth can be attributed to the ability to undertake, successfully execute and complete a variety of projects under the management and supervision of experienced Administrators, Project Managers and Engineers.

Working in the building and construction industry is a risky business. Contractor, subcontractor and their workers face risks from hazards that must be managed to prevent any accidents. Accordingly, strict guild lines and procedures have been enforced in order to preserve the interest of staff, management and community as a whole.
